Welcome Message

Dear Colleagues,

Welcome to the Department of Sociology at the University of Évora!

Walking around the city, you'll have the chance to breathe sociology into the old stones of the city, as Évora was the birthplace of the first sociology degree in Portugal, which recently celebrated its 60th anniversary (1964-2024).

Created in 1964 at the Higher Economic and Social Institute (ISESE), the first-degree course in Sociology was a milestone in Portugal, since until then the presence of Sociology in higher education had been limited to being a complementary subject to other academic programmes. Given the political context of the time, inextricably linked to the dictatorial regime that lasted until 1974, the recognition that the first degree in sociology in Portugal had been created in Évora ten years earlier is "surprising, even disconcerting", as the sociologist Fernando Luís Machado wrote.

The establishment of ISESE was an initiative of the Society of Jesus, in particular a group of Jesuits educated abroad, most notably Lúcio Craveiro da Silva, who was to become the first director of the Instituto Superior Económico e Social, with the support of the Eugénio de Almeida Foundation, created in Évora in 1963 by Vasco Maria Eugénio de Almeida, a renowned local patron, Count of Vill'Alva and agricultural entrepreneur.

The sociology course, recognised by the Ministry of National Education, ran at ISESE for 10 years, from 1964 to 1974. This course was interrupted by the 1974 revolution, due to a conflict between the students and the institute's management, which led the Jesuits to suspend teaching activities "sine die" after the 25 April revolution. The sociology programme, previously run by ISESE and the Escola Superior de Estudos Bento de Jesus Caraça (1975-1978), was later integrated into the University Institute of Évora (IUE), created in 1973, and then into the University of Évora in 1979. In the 1976/1977 academic year, the University Institute of Évora launched a Bachelor's degree in Social Sciences, with options in Economics and Sociology, thus reaping the rewards of the pioneering ISESE degree programmes in Évora at the time.

In the restored University of the late 1970s, in the same building that housed the old Jesuit University of Évora (1559-1759), the Department of Sociology has played an important role since its creation in 1976. Since then, the Department has been responsible for the graduation of hundreds of sociologists and has been part of many

different undergraduate and postgraduate courses, namely those related to education, economics, management, tourism, history, international relations and many others. Today, the Department of Sociology at the University of Évora is responsible for offering graduate and master courses in Sociology and Tourism. Together with the Institute for Research and Advanced Training of the University of Évora (IIFA) and the research center Interdisciplinary Centre of Social Sciences (CICS.NOVA) and Interdisciplinary Centre of History, Cultures and Societies (CIDEHUS), the teachers and researchers of the Department of Sociology are also involved in the Doctorate in Sociology and, more recently, in the Doctorate in Tourism, starting in 2025/26. Since 2015, the Department of Sociology has also integrated a consortium offering the PhD in Sociology: Knowledge for Open, Inclusive Societies (OPENSOC), an inter-university doctoral programme that upholds the relevance of sociological knowledge to understand contemporary societies and act upon them.

As you enter the Colégio do Espírito Santo building, the feeling of diving into the history of sociology in Portugal becomes even more intense. On the second floor you will find the "Centro do Mundo" [Centre of the World]. This is the informal name given by students to the architectural octagon in which there are tiled panels representing The Four Elements in Greek Cosmology: Water, Air, Fire and Earth. As you descend into the circle at the centre of the octagon, with the Library Room "Sala das Bellas Artes" on your right, you will find the 'Sociology Corridor' directly in front of you. This corridor, facing north-east, houses the offices of the Sociology teaching staff. At the beginning of the corridor, on your left, you will find the "Professor Augusto da Silva" room. Augusto da Silva (1929 - 2014) was a Jesuit priest who graduated in Sociology in Rome in 1966. He is an unforgettable reference for the affirmation of the discipline at ISESE, and later at the Institute and the University of Évora and, across the board, for the institutionalisation and consolidation of sociology in Portugal in the second half of the 20th century.

In anticipation of the European Capital of Culture 2027, Évora and the Department of Sociology of the University of Évora warmly welcome you to the European Sociological Association, Research Network 16 - Sociology of Health & Medicine Mid-term Conference!

The motto for Évora 2027 explores "another" way of living and being, of looking at ourselves and the world. In the Alentejo, the region where we are located, we call it VAGAR. From the bid book, Alentejo's vagar is defined as "the full awareness that we as humans are always one with the universe – an awareness that questions our position of dominance within it. This approach involves coevolution, restraint, creation and construction, taking space and time, memory and collectivity, along with resilience and tension." Having the opportunity to experience "vagar" as an(other) art of existence, we sincerely hope that you will take advantage of the city, university and the scientific environment from the ESA Mid-term Conference, and that Évora can be that living laboratory that brings people together to reflect on our position in the world and where new ideas and projects can blossom.

There's no shortage of sociological imagination!

Rosalina Pisco Costa & the Local Organizing Committee

Conference Chairs

Ana Patrícia Hilário (Conference Chair)

Ana Patrícia Hilário is a Medical Sociologist, working at the intersection between the Sociology of Health and Public Health. Currently, she is an Assistant Professor at University of Évora and a Researcher at CICS.NOVA.UÉvora. Previously, she was a Research Fellow and Co-Coordinator of the LIFE Research Group at the Social Sciences Institute of the University of Lisbon (ICS-ULisboa) in Portugal. She is a member of the CHARM network, the Task Force LGBT+ Inclusive Palliative & End-of-Life Care of the European Association of Palliative Care, and the COST-Action 'Participatory Approaches with Older Adults'. Throughout her career, she has participated in several national and international research projects and lectured at various universities in Portugal. Her work has been published in prestigious international journals, and she has served as a reviewer for journals in the fields of medical sociology and qualitative health research. She is an editorial board member of the journal 'Sociology of Health and Illness' and 'Análise Social'. Her international career was recognized with the University of Lisbon's 2021 Scientific Award for Social Sciences. She is the co-coordinator of the European Sociological Association, Research Network of Sociology of Health and Medicine (RN16).

Catarina Delaunay (Conference Co-Chair)

Catarina Delaunay is a Researcher at CICS.NOVA – Interdisciplinary Centre of Social Sciences, Universidade NOVA de Lisboa, where she has served as Deputy Director, Research Fellow, and Coordinator of the Population, Health and Well-being research group. She is a lecturer at Universidade Autónoma de Lisboa. She serves on the board of the Sociology of Health and Medicine research network of the European Sociological Association, where she was also newsletter editor. She is one of the three coordinators of the Sociology of Health section of the Portuguese Sociological Association. Previously, she was the Principal Investigator of an R&D project on lay and expert meaning-making about the embryo in vitro, funded by the Portuguese Foundation for Science and Technology (PTDC/SOC-SOC/29764/2017). She also coordinated the "Health Governance and Regulation" subgroup at NOVA Saúde Health Systems and Policies working group. Her master's dissertation received the Carolina Michaëlis de Vasconcelos Women's Research Prize in 2001 and was published as a book. She has organized several national and international scientific events. Her research has been published in various Scopus and WoS-indexed journals and by major international publishers. She is an Associate Editor of Interface: Communication, Health, Education and Humanities & Social Sciences Communications (Springer). She is a member of the Laboratory for Social Studies on Childbirth (CIES-Iscte) and of SEEN – Social Science Endometriosis Network.

Several decades after the first warnings from the scientific community about the impact of climate and environmental changes on human health and well-being, the challenges posed by the Anthropocene era are evident. Crises such as climate change, biodiversity loss, and land-use changes are driving ecosystems into new and unstable configurations, with profound consequences for human health. The Covid-19 pandemic underscored the urgent need to protect public health and strengthen healthcare systems to better respond to future emergencies. Furthermore, global population growth could lead to food production and water resource management crises, ultimately impacting the health and well-being of human populations. Sociology has the potential to contribute with empirically-driven analyses of the health-environmental nexus as well as to inspire and inform policies to address health crises. The purpose of this conference is to stimulate academic discussions about the nexus of health and environment, and provoke debate about the contribution that sociology could have, as well as to share local, national, and global answers for this planetary emergency.

Conference Information – Venues and Access – Colégio do Espírito Santo

Conference Information – Registration desks

The registration area will be located in Room 121 (ground floor) and will be open on 11 June from 8:45 to 13:00. After that, a registration desk will be in the lobby of the ground floor open until 17:00 (11 and 12 June).

Upon entering the building, you will find the registration desk room by turning right.

Conference Information – Coffee breaks and lunch areas

Coffee breaks

Coffee breaks will be available in the room next to Amphitheatre/Room 131.

Lunch

Lunch will be available at the university cafeteria (refeitório). Located near the bar on the ground floor.

Practical information and survival kit

Public Transportation from Lisbon to Évora

There are two main public transport options to travel from Lisbon to Évora:

By Train

- Trains to Évora depart from **Lisboa – Sete Rios or Oriente**
- The journey takes approximately **1 hour and 30 minutes**.
- Tickets can be purchased in advance through **Comboios de Portugal (CP)**:
www.cp.pt

By Bus

- Buses to Évora are operated by **Rede Expressos** and depart from **Sete Rios or Oriente Bus Terminal** in Lisbon.
- The trip takes around **1 hour and 45 minutes**.
- Tickets are available online at: www.rede-expressos.pt

From the airport you can take the subway Red Line to Oriente or Blue Line to Jardim do Zoológico / Sete Rios

Once in Évora

- The university is located within walking distance from the city center (approx. 15–20 minutes).
- Alternatively, you can take a **local bus** or **taxi** to the university campus.

Restrooms

There are three restroom facilities available in the building:

- **Near the bar/cafeteria** – easily accessible from the dining area.
- **Near the main entrance** – convenient upon arrival.
- **Near Amphitheatre/Room 131** – located within the adjacent garden area.

Social Dinner – 11 June – 20:00 [FOR REGISTERED PARTICIPANTS ONLY]

Hotel Mar D'Ar Muralhas

Tv. da Palmeira 4, 7000-546 Évora

Social Dinner – 12 June – 20:00 [FOR REGISTERED PARTICIPANTS ONLY]

Hotel Olive

Rua Eborim, 18, 7000-659 Évora

Network Access – Universidade de Évora

Once you are on-site, please authenticate through the captive portal using the credentials below:

- **Username:** ESARN16
- **Password:** ESARN16

You will be prompted to enter these credentials when connecting to the network for the first time.

Keynote Speakers Information

Tiago Correia, PhD, is an Associate Professor of Global Public Health at the Institute of Hygiene and Tropical Medicine, Universidade Nova de Lisboa (IHMT-UNL). He is actively involved in academic groups across Africa, Brazil, and Europe, fostering international collaboration in global and public health. His academic leadership is demonstrated through his role as Editor-in-Chief of the International Journal of Health Planning and Management, the coordination of research and development projects funded by European Union agencies and consultancy services for national governments and international organizations. Having earned his Habilitation in International Health with a specialization in health policies and development, Professor Correia holds several positions, including Vice-President of the Public Health Workforce Development thematic committee at the International Association of National Public Health Institutes, Vice-President of Health and Care Workforce at the European Public Health Association, a board member of the European Health Management Association, and Head of the WHO Collaborating Center on Health Workforce Policy and Planning.

Éve Dube is an adjunct professor in the Department of Anthropology at Laval University and a researcher in the Infectious and Immune Diseases program of the CHU de Québec-Université Laval Research Center. Her field of expertise is anthropology of public health. She is particularly interested in the social, cultural, historical, and religious dimensions of infectious disease prevention. She holds the CIHR Applied Public Health Chair on the Anthropology of Vaccination INSPQ-ULaval. She is the chair of the Social Science and Humanities Network of the Canadian Immunization Research Network since 2014. She sits on several Canadian (e.g., National Advisory Committee on Immunization, Canadian Association for Immunization Research and Evaluation) and international (e.g., WHO's Strategic and Technical Advisory Group on Infectious Hazards, WHO's Global Advisory Committee on Vaccine Safety) committees as an expert on vaccine hesitancy.

Opening Session

11 June 2025 | 9:15 | Auditório/Room Colégio Espírito Santo

(Please note that the Auditório Colégio Espírito Santo is located outside the main building. From the corridor of the registration room, after room 118, you will find a staircase that leads directly outside to the auditorium.)

The opening ceremony will be held at the Auditório/Room Colégio Espírito Santo. This session will feature the speeches of:

Ana Telles (Vice-Dean of University of Évora)

André Carmo (Pole Coordinator - CICS.NOVA.UÉvora)

Andreia Dionísio (Vice-Directress of IIFA)

Dino Numerato (Coordinator of ESA RN16, Charles University)

¹*University of Turin*; ²*Centro Interdisciplinar de Ciências Sociais, Universidade de Évora*
alice.scavarda@unito.it; patriciahilario@gmail.com

**Join us for a workshop that transforms your research
insights into captivating art!**

Have you ever imagined drawing during a scientific conference? Have you ever dream of engaging in graphic activities while discussing your research topics? Are you interested in understanding the potential of Graphic Medicine and comics based research? Do you enjoy socialising with colleagues in an informal setting? If the answer is yes, this Graphic Medicine workshop is for you! We invite colleagues to join us on Wednesday 11 June to artistically produce their visual and/or graphic accounts of the relationship between Anthropocene and health. Inspired by Graphic Medicine, through a collaborative and immersive experience, colleagues will be able to explore the use of graphic methods. The organisers will provide some examples of the use of comics and visual/graphic methods in qualitative research. A range of materials such as coloured pencils, photographs and watercolours will be made available to participants. No previous experience of arts-based research methods is required. We will conclude by discussing the main strengths and pitfalls of the methods used and reflecting together on the experience. The artworks will be presented and exposed during the last day of the conference.

Session 17: Resilient Issues and Emerging Needs in Palliative and End-of-Life Care. The Perspective of Health Sociology

Room 121

17:30-19:00

Session Conveners:

Since U.S. President Donald Trump took office in January 2025, his administration has implemented sweeping changes to the federal government that have significantly disrupted research and academic institutions in the United States and beyond.

Massive cuts to federal funding for U.S. universities—including the cancellation of research grants and contracts—have sparked widespread protests among scientists and academics. Notably, a large proportion of the canceled funding pertains to health research and biomedicine, a shift that is expected to have long-term consequences for both global health and climate-related research.

In response to these drastic changes, many scientists are contemplating emigration. According to a recent *Nature* poll, 75% of surveyed researchers have considered relocating, with Europe and Canada emerging as preferred destinations.

A parallel development is occurring in Argentina, where President Javier Milei's economic agenda—aimed at reducing the national deficit and curbing inflation—has introduced new uncertainties for the country's scientific community. A recent government resolution proposing a review of ongoing scientific programs has been interpreted by many researchers as a veiled attempt to dismantle research in the social and environmental sciences.

These developments raise urgent questions about the future of research, particularly in the field of health and medicine, and call for critical reflection on the role of social sciences, namely sociology of health and medicine, in understanding and responding to these global shifts.

Session 29: For a Sociology of Childbirth: Understanding the Social and Cultural Dimensions of Birth

Room 124
